新意网公布 2024/25 年度中期业绩

SUNeVision Holdings Ltd. announced that for the six months ended 31 December 2024, its revenue increased by 14% year-on-year to HK\$1,470 million, driven primarily by higher revenue from its data centre and IT facilities business. EBITDA rose by 17% year-on-year to HK\$1,053 million, and profit attributable to shareholders increased by 11% year-on-year to HK\$484 million.

During the period under review, the growing demand for artificial intelligence (AI)-driven applications benefitted Hong Kong data centres. Phase 1 of MEGA IDC, which opened in the first half of 2024 with cutting-edge infrastructure and superior power provision, is well-suited for housing AI applications.

The recent emergence of DeepSeek signifies another phase in AI development. Looking ahead, SUNeVision remains optimistic about the opportunities brought on by AI and is well-placed to benefit from the trend. Given the volatile economic situation, SUNeVision will continue to adhere to stringent cost discipline in capital and operating expenditure to enhance overall returns for stakeholders.
